

Biological Medicine - The Future of Natural Healing

Language:	English
Author:	Dr. med. Thomas Rau
Type of article:	Book
Teaser:	<p>"We treat humans, not symptoms or diagnoses. We support the regulatory forces in the human, which brings healing from the inside."</p> <p>Biological Medicine, published for the first time in this form, is a combination of the latest diagnostic technology and a broad range of traditional, natural healing methods including holistic dentistry and orthomolecular medicine.</p> <p>Biological Medicine is based on a way of thinking different from that of modern Western orthodox medicine, a "functional" thinking: every symptom has a meaning and a cause and is the body's response to an internal disturbance. The methods of Biological Medicine uncover disturbances of the inner milieu and burdens and shows ways of treatment of:</p> <ul style="list-style-type: none">Chronic diseasesMetabolic disorders such as diabetes, high cholesterol, allergies etc.OverweightHeart and lung diseasesDiseases of the locomotor systemNeurological disordersCancers
